

MINOR IN GEOMATICS AND SPATIAL ANALYSIS

Geomatics is a rapidly expanding branch of geography with concrete applications in areas such as health-care planning, epidemiology, criminology, defense and security, disaster management, environmental and resource monitoring, and urban planning. Geographic information systems (GIS), remote sensing and global positioning systems have also made it easier to capture, manage and visualize geographic information. From producing more efficient transit schedules to mapping disease outbreaks or assessing the seismic or health risks associated to our built environments, geomatics plays an essential role.

This program is offered in English and in French.

Program Requirements

The table below includes only discipline-specific courses. Please refer to the Academic Regulations (<https://www.uottawa.ca/about-us/policies-regulations/academic-regulations/b-2-program-studies/>) for information on including a minor to your degree.

Requirements for this program have been modified. Please consult the 2015-2016 calendars (<http://www.uottawa.ca/academic/info/regist/1516/calendars/>) for the previous requirements.

GEG 2320	GIS and the Digital Earth	3 Units
GEG 3105	Earth Observation	3 Units
GEG 3312	Digital Earth Analysis Modeling	3 Units
6 course units from:		6 Units
GEG 2108	Contested Places	
GEG 2110	Sustainable Cities	
GEG 2301	Geomorphology	
GEG 2304	Climatology	
15 optional course units in geography (GEG)		15 Units
Total:		30 Units
